Overview

High-Performance HDPE Plastic Pallet

This durable 48x40 inch plastic pallet is engineered for efficient material handling and storage across diverse industrial environments. Constructed from high-density polyethylene (HDPE), it offers superior resistance to moisture, chemicals, and impact compared to traditional wooden alternatives. The design features a four-way entry for forklift accessibility and a nestable structure to optimize storage space when not in use.

Technical Specifications

Model Number	PL1210-500A
Dimensions (Metric)	1200 x 1000 mm
Dimensions (Imperial)	48 x 40 inch
Net Weight	6.3 kg

Performance Metrics

Load Capacities

500 kg

Dynamic Load

1500 kg

Static Load

Features

Material

HDPE • High-Density Polyethylene

Key Features

- Four-way entry for forklifts and pallet jacks
- Nestable design for space-saving storage
- Open deck construction for ventilation and drainage
- Non-porous, easy-to-clean surface
- Resistant to moisture, chemicals, and pests
