Overview

Premium 4K ULED Experience

This advanced 4K ULED television combines Quantum Dot technology with Full Array Local Dimming Pro to deliver exceptional color accuracy and deep, lifelike contrast. Engineered for immersive entertainment, it features a native 120Hz refresh rate with MEMC technology for smooth motion and Dolby Vision support for vivid HDR content. With integrated smart features, voice control, and dedicated modes for gaming and sports, this display is designed to meet the demands of high-performance viewing environments.
