

4SN Submersible Water Pump

This submersible pump is designed for efficient water extraction. Its robust construction ensures long-lasting performance in demanding environments, making it ideal for various applications including well water supply, irrigation, and dewatering.

Product Overview

4SN Submersible Water Pump

The 4SN submersible water pump is a versatile solution engineered for efficient water extraction and management. Designed for both civil and industrial applications, it excels in tasks ranging from well water supply and irrigation to pressure boosting in buildings. Its robust construction ensures reliable performance in diverse environments, including pond culture and decorative fountains.

Applications & Use Cases

Primary Applications

Well Water Supply, Irrigation, Civil Engineering, Industrial Use, Pressure Boosting, Pond Culture, Fountains

Performance Features

Key Features

- High-performance extraction capability
- Durable construction for demanding environments
- Compact design for easy installation
- Suitable for residential and agricultural settings
