

5-Inch Pneumatic Self-Vacuuming Sander

This 5-inch pneumatic sander is designed for efficient material removal and surface preparation. The self-vacuuming system effectively removes dust and debris, ensuring a cleaner working environment.

Product Overview

Professional Performance

This 5-inch pneumatic self-vacuuming sander is engineered for high-efficiency material removal and surface preparation across wood, metal, and composite materials. Its integrated self-vacuuming system significantly improves visibility and maintains a cleaner workspace by effectively capturing dust and debris. Designed with ergonomics in mind, this tool offers comfortable handling to reduce user fatigue during extended industrial operations.

Performance Metrics

Idling Speed

10000 RPM

Idling Speed

Average Gas Consumption

2.8 cfm

Technical Specifications

Sanding Pad Size	5 inches
Net Weight	1.15 kg
Air Inlet (NPT)	1/4 inch
Air Hose Inner Diameter	3/8 inch
Recommended Air Flow	2 HP

Features

Key Features	Self-Vacuuming, Dust Collection System, Pneumatic Operation, Ergonomic Design
