

# 5 Ton Wheel Loader

The 5 ton wheel loader is a robust machine suited for ports, mines, and engineering construction. It offers a 2.5m<sup>3</sup> bucket and a breakout force of 160kN for efficient material handling.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance 5 Ton Wheel Loader

This robust 5-ton wheel loader is an ideal choice for heavy-duty applications in ports, mining, engineering construction, and logistics. Designed with a high-strength frame and a powerful hydraulic system, it offers exceptional breakout force and durability in demanding environments. The machine features an ergonomic cabin and is highly adaptable, supporting a wide range of optional work tools for versatile operations.

## Core Performance

### Operational Metrics

**5000 kg**

Rated Operating Load

**160 kN**

Breakout Force

**3.5 m**

Min. Dumping Height

## Technical Specifications

### Technical Data

Specification	Value
Bucket Capacity	2.5–4.5 m <sup>3</sup>
Machine Weight	17500±300 kg
Dump clearance at max lift	3100–3780 mm
Reach at max lift	1100–1220 mm

## Equipment Versatility

### Optional Attachments

Side-dump bucket, Clipping plier, Clipping teeth, Toad's mouth clamp, Port plier, Grasping grass machine, Snowplow, Pallet fork
