

50 kVA Trailer Mounted Diesel Generator

This towable 50 kVA diesel generator provides a stable and efficient power supply. Its trailer-mounted design ensures easy transportation and deployment to different locations.

Overview

Versatile Portable Power Solution

This 50 kVA trailer-mounted diesel generator is engineered for mobility and reliable performance across diverse environments. Featuring a robust engine and a high-stability generator, it provides a consistent power supply for demanding applications such as construction sites, outdoor events, and emergency backup scenarios. The integrated trailer design facilitates rapid deployment and easy transportation between locations.

Key Performance

Power Capacity

50 kVA

Rated Power

Mobility Type

Trailer Mounted • Portable

Engine & Alternator

Alternator Characteristics

- Reliable generator coupling
- Stable voltage output
- High efficiency performance

Engine System

Robust diesel engine designed for stable and efficient power supply

Control & Safety

Monitoring & Operation

Integrated control panel for real-time monitoring and operational management

Safety Protections

Overload Protection, Engine Safety Features, Operational Safety

Applications

Recommended Applications

- Construction Sites
- Public Events
- Emergency Power Backup
- Remote Location Power

Physical Construction

Construction

Durable construction designed for long-lasting performance in outdoor environments
