

50 Liter Oil-Lubricated Direct Drive Piston Air Compressor

This 50-liter air compressor utilizes an oil-lubricated, direct-drive piston mechanism. It is designed to provide a reliable source of compressed air for various pneumatic applications.

Overview

Direct-drive piston compressor featuring a 50-liter tank and integrated pressure gauges.

Professional Performance in a Portable Design

This 50-liter oil-lubricated air compressor is engineered for reliability, utilizing a direct-drive piston mechanism for efficient power transfer. Designed with professional-grade materials, it features a durable cast iron cylinder and an aluminum crankcase for superior heat dissipation. With adjustable pressure settings and integrated thermal protection, it provides a safe and versatile solution for various pneumatic applications.

Key Performance Metrics

| | | | |
|------------------------------|----------------------------------|------------------------------|------------------------------------|
| 1.5 kW Motor Power | 198 L/min Max Air Flow | 8 bar Max Pressure | 2850 rpm Operating Speed |
|------------------------------|----------------------------------|------------------------------|------------------------------------|

Electrical Requirements

- Voltage: 127V / 230V
- Frequency: 50Hz

|--------------|--------|
| Model | CEFL50 |
|--------------|--------|

Design and Build

Portable design with wheel and handle configuration for improved maneuverability.

Operating Features

- Pressure switch with adjustable cut-in/cut-off settings
- Regulator with pressure gauge
- Easy-open drain valve
- Quick connector included
- Ergonomic carry handle for portability

Construction Details

Oil-lubricated, Cast iron cylinder, Aluminum cylinder head, Thermal protection system, Plastic-coated tank

Compliance

Certifications

CE • ISO 9001 • TUV • RoHS • GS
