

5000kg Wheel Loader for Construction

This 5000kg wheel loader is a heavy-duty machine designed for efficient material handling in construction and mining environments. It features a robust hydraulic system and a comfortable operator cabin for enhanced productivity.

Product Overview

Heavy-Duty Construction Performance

The 5000kg wheel loader is a robust and powerful machine engineered for heavy-duty material handling in demanding environments such as construction sites and mining operations. It features a high-torque engine, a reinforced chassis, and an efficient hydraulic system to maximize productivity and ensure operational reliability. With a focus on operator comfort and ease of maintenance, this machine provides the strength and precision needed for large-scale earthmoving and loading tasks.

Key Performance Metrics

Core Specifications

5000 kg
Rated Load

3 m³
Bucket Capacity

170 kN
Max Breakout Force

162 kW
Rated Power

Technical Specifications

Machine Dimensions

Parameter	Value
Overall Dimensions	7960*3070*3490mm
Wheel Base	3200mm
Wheel Tread	2250mm
Min Ground Clearance	478mm

Operational Capabilities

- Dumping Height: 3100mm
- Dumping Reach: 1285mm
- Max Travel Speed: 36km/h
- Min Turning Radius: 6360mm
- Steering Angle: 35°
- Max Grade Ability: 28°

Equipment Options

Available Options

Cummins Engine, ZF Gearbox Options, Air Conditioning, Joystick Control, Quick-hitch, Fork Attachment, ROPS Cabin
