

500mAh Lithium-Ion Rechargeable Battery

This is a lithium-ion rechargeable battery cell. It has a capacity of 500 mAh and is designed for electronic devices and power supply applications.

Product Overview

High-Performance Lithium-Ion Cell

This 500mAh lithium-ion rechargeable battery is engineered for reliable power delivery in compact electronic devices. Designed with efficiency and longevity in mind, it provides a stable energy source for various power supply applications. Its standardized form factor ensures compatibility with a wide range of modern portable electronics.

Technical Specifications

Capacity

500 mAh

Capacity

Chemistry	Lithium-Ion
Model Identifier	LI382746A

Features

Best For	Portable Electronics, Power Supply Units, Consumer Devices
Rechargeable	Yes
