Overview

High-Efficiency Portable Cooling

This 52L portable refrigerator is engineered for reliable performance in vehicles, camping, and outdoor settings. Featuring a dual-zone design with a freezer and refrigerator compartment, it achieves temperatures as low as -20°C. With advanced insulation and intelligent battery protection, it provides a dependable cooling solution for long-term travel.

Technical Specifications

Net Capacity	52 L
Max Mode Power	45 W
ECO Mode Power	27 W
Voltage Compatibility	12V DC, 110V AC
Insulation Thickness	40 mm

Performance

Cooling Performance

-20 °C

Lowest Temp

10 hours

Hold Time (Off)

Compartment Zones

Freezer • Refrigerator

Construction & Design

Build Materials

- Steel exterior finish
- Aluminum interior wall

Safety & Convenience

- Intelligent battery protection
- Anti-pinch closure design
- Strapping handle
- Integrated drain plug

Control Interface

Intelligent LED touch control panel
