Product Overview

Compact Power for Narrow Spaces

The 5.4 Ton Mini Foldable Crawler Crane is a versatile lifting solution engineered for confined spaces and challenging terrains. Featuring a hydraulic crawler system and a 5-section telescopic boom, it offers exceptional maneuverability and precise load positioning. Designed with advanced structural analysis, this crane ensures stable performance and reliable operation for construction and industrial maintenance tasks.

Performance

Key Capabilities

5.4 t

Crane Capacity

16 m

Max Operating Radius

16.9 m

Max Lifting Height

Boom Configuration

5 section with fly jib

Technical Specifications

Winch Specifications

| Feature | Value |
|----------------------|--------------------|
| Hook up speed | 10 m/min (4 falls) |
| Wire rope dimensions | Ø10 x 80 m |

Design & Construction

Hydraulic Crawler, Hydraulic Winching, Hydraulic Slewing, Foldable Design
