

5.5 HP Petrol Engine

This 5.5 HP engine is designed for various applications. It features a compact and durable design, suitable for powering small machinery and equipment.

Overview

Reliable Power for Small Machinery

This 5.5 HP petrol engine is engineered for versatile applications, making it an excellent choice for powering small machinery and equipment. Designed with efficiency and durability in mind, it features overhead valve (OHV) technology to optimize performance and fuel consumption. Its robust construction ensures long-term reliability for both professional-grade tasks and demanding DIY projects.
