

5.5kW Gasoline Generator with Copper Coil

This gasoline generator provides electrical power for various applications. It features a copper coil, delivering 5000 running watts and 5500 maximum watts, and includes a digital display.

Product Overview

Reliable Power Generation

This gasoline-powered generator is engineered to provide consistent electrical power for a wide range of professional and commercial applications. Featuring a 100% copper coil for efficient energy conversion, the unit ensures stable performance under load. Its durable frame design offers both protection during operation and ease of portability for field use.

Power Output

5000 W

Running Watts

5500 W

Maximum Watts

Features

Key Features

- 100% Copper Coil for efficient energy conversion
- Digital monitoring display
- Integrated voltmeter
- Engine switch for start/stop operation
- AC power outlets
- Durable protective frame

Coil Material

100% Copper
