

56-Tooth Sprocket with 4-Inch Bore

This is an 80R56 sprocket with a 4-inch bore. It is designed for power transmission applications.

Product Overview

Industrial Grade 80R56 Sprocket

This 80R56 industrial sprocket is engineered for reliable power transmission in heavy-duty machinery. Featuring a 56-tooth design and a precise 4-inch bore, it ensures smooth chain engagement and long-term durability. The inclusion of a standard keyway allows for secure mounting, making it an ideal component for demanding industrial applications.

Technical Specifications

Number of Teeth	56
Pitch	1 inch
Chain Size	80
Bore Diameter	4 inch
Keyway Dimensions	3/4" x 1/4"
Key Features	Industrial Grade, Precision Engineered, Power Transmission
