Product Overview

Versatile Multi-Purpose Rope

This solid braid polypropylene rope is engineered for durability and performance across a wide range of disciplines, from marine environments to camping and general utility. Constructed with high-quality multifilament polypropylene (MFP), it offers superior softness and strength compared to traditional polypropylene options. The solid braid design ensures the rope remains round, flexible, and resistant to unraveling even when cut, providing reliable performance in both wet and dry conditions.

Physical Properties

Diameter	0.625 inch
Total Length	140 ft
Construction	Solid Braid
Material	Multifilament Polypropylene (MFP)

Performance Metrics

Key Performance Indicators

105 lbs
Working Load Limit

Key Features

Floats in water, Resistant to rot, Mildew resistant, Abrasion resistant, Chemical resistant, Minimal stretch

Usage & Handling

Recommended Applications

- Marine / Boating
- Camping
- Stables
- Crafting
- General Utility
