Overview

Reliable Silent Power Generation

This 5kW diesel generator is engineered for reliable, quiet operation in both construction and outdoor environments. Featuring a soundproof enclosure and double mufflers, it minimizes noise while delivering stable power output. Equipped with electric start, low-oil shutdown, and a robust steel fuel tank, this unit is designed for ease of use, safety, and extended run times during demanding conditions.

Performance

Peak Power	4200 W
Running Power	4500 W
Run Time at 50% Load	7.3 hours

Engine & Mechanics

Engine Displacement	418 cc
---------------------	--------

Features & Safety

Key Features

- Electric start with battery included
- Low-oil level automatic shutdown
- Hydraulic-magnetic circuit breaker
- Double mufflers for quiet operation
- Covered outlets for environmental protection
- Steel fuel tank with integrated gauge

Control Panel Components

- Voltmeter
- Circuit breaker
- AC outlets
- DC output for battery charging
- Low oil warning indicator

Certifications

CE, EMC, Noise EU-V
