Overview

Versatile Tactical Optical Precision

The 6-24x50 AOE Illuminated Dot Rifle Scope is a high-performance optical instrument engineered for precision target acquisition across varying distances. With adjustable magnification from 6x to 24x and a large 50mm objective lens, it ensures exceptional light gathering and clarity in diverse environments. The integrated parallax correction and dual-color illumination provide the flexibility needed for demanding tactical applications.

Technical Specifications

Magnification Range	6x - 24x
Objective Lens Diameter	50 mm
Total Length	400 mm
Eyepiece Diameter	45 mm

Features

Adjustment Capabilities

- Parallax correction (AOE)
- Windage adjustment
- Elevation adjustment
- Adjustable illumination brightness
