

6-Inch Centrifugal Self-Priming Dewatering Diesel Pump Set

This 6-inch centrifugal pump set is engineered for self-priming and efficient dewatering. Its diesel engine provides reliable power for demanding applications.

Overview

High-Performance Dewatering Solution

This 6-inch centrifugal self-priming diesel pump set is engineered for efficient water transport and lifting, particularly in environments containing abrasive solids in suspension. Designed for portability and power, it serves as an ideal dewatering solution for construction sites, mining operations, and municipal flood control where external power sources are unavailable. Its robust construction ensures reliable, long-lasting performance in the most demanding field conditions.

Technical Specifications

Pump Size	6 inch
Pump Type	Centrifugal Self-Priming
Power Source	Diesel Engine

Applications

Suitable Applications	Construction Dewatering, Mining Operations, Floodwater Management, Stream Diversion, Municipal Applications, Agricultural Use
-----------------------	---

Key Features

Performance Highlights

6 inch Inlet/Outlet Size	1 Yes Self-Priming Capability
