

6-Inch Dual Action Air Sander

This pneumatic power tool is designed for sanding and polishing surfaces. It features a 6-inch sanding pad and operates using compressed air to deliver a smooth finish.

Overview

Professional Dual Action Air Sander

This 6-inch dual action air sander is engineered for precision surface finishing, delivering a swirl-free, patternless finish ideal for professional applications. Featuring a built-in regulator for positive speed control and a dual-action mechanism, it ensures smooth, circulating motion for consistent results. It is highly suitable for demanding tasks such as feather edging, metal preparation, and blending body filler.
