

60-Inch Ceiling Fan with Five-Speed Regulator

This ceiling fan has a 60-inch size and includes a five-speed regulator for adjusting airflow. It operates at 220V with a 50Hz frequency and a motor speed of 290 R.P.M.

Product Overview

High-Performance Industrial Ceiling Fan

This 60-inch industrial ceiling fan is engineered for reliability and efficient air circulation in professional environments. Featuring a robust 85W motor and a five-speed regulator, it offers precise control over airflow to suit various operational needs. The durable iron construction ensures long-term performance, making it a dependable choice for large spaces requiring consistent cooling.
