

6.0-Ton Capacity Heavy Equipment Roller Skids

Surface treated for enhanced durability and aesthetics. Designed for moving heavy loads, these roller skids have a capacity of 6.0 metric tons.

Overview

Heavy-Duty Material Handling Solution

These 6.0-ton capacity heavy equipment roller skids are designed for the safe and efficient transport of heavy machinery and large items in industrial and commercial environments. Featuring a 360-degree rotating cap and an improved turntable structure, these skates provide exceptional maneuverability and stability during relocation tasks. Built for durability and ease of use, they are an essential tool for warehousing, distribution, and logistics operations.

Technical Specifications

Load Capacity

6 MT

Max Load

Model Number

RN-6

Rotation

360-degree rotation cap

Features

Key Features

- Improved turntable structure for increased flexibility
- Surface treated for enhanced durability and finish
- Heavy-duty construction for industrial applications
- Designed for safe machinery and appliance transport

Applications

Recommended Use Cases

Warehousing, Distribution, Machinery Relocation, Commercial Logistics, Household Appliance Moving
