

6000ZZ Deep Groove Ball Bearing

This deep groove ball bearing features excellent anti-corrosion properties and is made from bearing steel. The 6000ZZ bearing is robust, easy to maintain, and suitable for high speeds.

Product Overview

6000ZZ Deep Groove Ball Bearing

The 6000ZZ is a versatile, self-retaining deep groove ball bearing designed for robust operation and ease of maintenance. Featuring a simple design with solid inner and outer rings, it is engineered for low frictional torque, making it an excellent choice for high-speed applications. This product offers high quality and reliable performance in a variety of industrial settings.

Technical Specifications

Corrosion Resistance

Excellent

Material

Bearing steel (Chrome steel)

Bearing Type

Deep Groove, Single Row, Shielded (ZZ)
