

# 600W 90:1 Gear Reduction Electric Motor for Truck Tarps

This 600W electric motor is designed with a 90:1 gear reduction for optimal performance. It is commonly used in dump truck tarp systems to provide reliable power for covering and uncovering truck beds.

## Product Overview

### High-Torque Tarp Motor Solution

This 600W electric motor is engineered specifically for heavy-duty dump truck tarp systems, featuring a powerful 90:1 gear reduction ratio. Designed for reliability in demanding environments, it provides the high torque necessary for precise and controlled tarp movement. The compact design and robust construction ensure long-lasting performance and easy installation for professional fleet applications.

## Performance Metrics

### Key Performance Indicators

**600 W**

Power Output

**90 :1**

Gear Ratio

## Technical Specifications

Output Shaft Dimensions	3 1/8" x 3/4"
Rated Power	600 W
Reduction Ratio	90:1

## Design & Build

### Cover Material/Finish

Chrome

### Key Features

- Compact design for tight installations
- High torque output for heavy loads
- Robust construction for durability
- Chrome protective cover

## Compatibility

Primary Application	Dump Truck Tarp Systems
Interchangeable Models	61X, 61L, 1030, 1031, 11521, 13655, 5000XT90
