

60W Monocrystalline Solar Panel

This 60W solar panel is designed for renewable energy applications. It is ideal for off-grid systems, battery charging, and small-scale power generation.

ADDITIONAL IMAGES

Overview

High-Efficiency Monocrystalline Performance

This 60W monocrystalline solar panel is engineered for reliable renewable energy applications, making it an ideal choice for off-grid systems, battery charging, and small-scale power generation. Built with durable, weather-resistant materials, it ensures consistent power output across various environmental conditions. Its design prioritizes high light transmittance and longevity, suitable for both residential and commercial installations.

Technical Specifications

Rated Power

60 W

Power Output

Cell Technology

Monocrystalline

Suitable Applications

Off-grid systems, Battery charging, Residential, Commercial, Grid-tie systems

Features

Key Features

- High light transmittance
- Weather-resistant construction
- Long operational lifespan
- Durable material composition
