

61807 Deep Groove Ball Bearing

35x47x7mm

The 61807 deep groove ball bearing features hardened steel races and precision-ground balls for smooth, efficient operation. It is designed for high-speed applications and can handle both radial and axial loads.

Overview

High-Precision 61807 Deep Groove Ball Bearing

The 61807 deep groove ball bearing is engineered for optimal performance in demanding industrial applications. Featuring precision-ground components, this bearing ensures smooth, efficient operation and extended service life. It is designed to handle both radial and axial loads, making it a reliable choice for high-speed machinery and equipment.
