Overview

High-Performance Silent Power Solution

This 62.6 KVA diesel generator set is engineered for reliability and quiet operation in demanding environments. Designed for both prime and standby power applications, it features advanced soundproofing technology and robust environmental adaptability. With efficient fuel consumption and rapid startup capabilities, it provides a dependable power source suitable for industrial and commercial use.

Technical Specifications

Rated Power

62.6 KVA
Rated Power

Performance Features

- Compact structure with high power density
- Low noise operation for sensitive environments
- Rapid startup (full power within seconds)
- High voltage regulation accuracy
- Excellent dynamic performance

Environmental Adaptability

High Temperature, High Altitude, Cold Climate, Arid/Low Water Areas

Compliance & Quality

Certifications

CE • EPA • ISO 9001:2015

Control & Components

Control Panel Components

Component	Function
Speed Controller	Precise engine speed management
Automatic Transfer Switch (ATS)	Seamless switching between main and standby power
Terminal Blocks	Three-phase (U, V, W) and Neutral (N) connections
