

6.5" 2-Way Component Speaker System

This component speaker system has a 6.5" woofer with a 10oz magnet and 1" voice coil. It is designed for audiophile-grade sound reproduction with exceptional clarity.

Product Overview

High-Performance Component Speaker Systems

These 2-way component speaker systems are engineered for audiophile-grade sound reproduction, delivering exceptional clarity and detail across the frequency spectrum. Featuring durable injection cones with rubber edges and precision crossover networks, these speakers ensure seamless integration between the woofer and tweeter for a balanced, immersive listening experience. Designed for versatility, they are an ideal choice for upgrading automotive audio systems or constructing custom home audio setups.
