

6.5 HP Electronic Ignition Engine with Oil Alert

The 6.5HP Electronic Ignition Engine is designed for diverse applications. It features an oil alert system and electronic ignition for reliable performance and easy starting.

Product Overview

High-Performance 6.5 HP Engine

This 6.5 HP electronic ignition engine is engineered for versatility and reliability in demanding work environments. Equipped with an integrated oil alert system to prevent damage and ensure longevity, it provides consistent power for essential machinery like generators and water pumps. The robust design utilizes 100% copper wiring to optimize efficiency and durability for professional applications.

Certifications

Quality Standards	CE, ISO 9001:2000
-------------------	-------------------

Technical Specifications

Performance Metrics

6.5 HP Max Power Output	313 g/HP-hour Fuel Consumption
-----------------------------------	--

Core Specifications

Parameter	Value
Displacement	cc
Compression Ratio	N/A
Starting System	Electronic Ignition

Logistics

Logistics Data

- Gross Weight: Specified in Kg
- Container Load: 20'FCL
