

6.5 HP Gas Powered Snow Blower

This snow blower is designed for efficient snow removal. It features a powerful engine and a robust auger system for breaking up and clearing snow, and a discharge chute for directing the snow away from the cleared area.

Product Overview

High-Performance Snow Removal

This 6.5 HP gas-powered snow blower is engineered for efficient snow clearance in challenging winter conditions. It features a robust design with a 61 cm working width, making it ideal for clearing driveways and walkways quickly. With a manual start engine and versatile multi-gear transmission, this machine offers reliable performance and maneuverability for professional and residential use.

Technical Specifications
