

6.5 HP Gasoline Engine

This 6.5 HP gasoline engine is designed for a variety of applications. It features durable construction and efficient combustion, providing reliable power for machinery and equipment.

Overview

High-Performance 6.5 HP Gasoline Engine

This 6.5 HP gasoline engine features a durable, air-cooled 4-stroke OHV design, engineered for reliable power across diverse industrial and agricultural applications. With a compact footprint and efficient combustion system, it is an ideal power source for generators, water pumps, and tillers. The unit is built for longevity and consistent performance, offering both recoil and electric starting options for ease of use.

Performance

Power Output

6.5 HP

Max Power

3.68 kW

Max Power

12.5 Nm

Net Torque

Engine Specifications

Parameter	Value
Engine Type	Air-cooled 4-stroke OHV
Displacement	196 cm ³
Bore x Stroke	68 x 54 mm
Compression Ratio	8.5:1

Operation

Fuel System

- Fuel Tank Capacity: 3.6L
- Carburetor: Butterfly
- Fuel: Unleaded 86 octane or higher

Starting System

Recoil Starter, Electric

Lubrication System

Splash

Physical Dimensions

Engine Weight

15 kg

Dry Weight

16 kg

Gross Weight

Dimensions (L x W x H)

387 x 330 x 360 mm

Logistics

FCL Quantity (20'/40')

636 / 1519
