Overview

Reliable Power Solution

This 6.5 HP gasoline engine is engineered for consistent performance and long-lasting durability in demanding environments. Designed as a versatile, single-cylinder, air-cooled unit, it is ideal for powering essential equipment such as generators, water pumps, and various small machinery. With robust construction and integrated safety features, this engine provides dependable operation for both professional and DIY applications.

Technical Specifications

Engine Configuration

Single-cylinder, Air-cooled, Gasoline

Safety & Operation

Operational Safety

- Extremely flammable fuel and vapors
- Allow engine to cool for at least 2 minutes before refueling
- Includes warning labels for safe operation

Maintenance

Maintenance Guidelines

Component	Action Required
Air Cleaner	Regular maintenance required
