

65W Air Mover Blower Fan

This air mover is designed for quick and efficient drying. It features a durable housing, multiple speed settings, and a focused airflow pattern.

Overview

Compact High-Performance Air Mover

This 65W air mover is designed for rapid drying and efficient air circulation in professional settings. With a 1/12HP motor, it delivers a focused airflow of 580m³/h, making it an essential tool for water damage restoration, carpet drying, and general ventilation tasks. Its lightweight, portable design and integrated handle ensure easy transport between job sites.
