Product Overview

High-Performance Inverter Generator

This 6kW open-frame inverter generator offers a robust and stable power solution for both professional and residential applications. Featuring advanced inverter technology with a THD of less than 3%, it delivers clean power suitable for sensitive electronic equipment. The integrated economy system optimizes fuel consumption by adjusting engine speed based on load and temperature, while the durable design ensures portability and reliability on the job site.

Performance Specifications

Continuous Power Output

6 kW

Continuous Output

Total Harmonic Distortion (THD) < 3%

Fuel Tank Capacity 25 L

Economy System Yes

Power & Connectivity

AC Output Configurations

- 120V AC
- 120V/240V AC

DC Output 12V

Optional Enhancements Remote Control, One-Button Push Start, ATS, USB, Parallel Capability

Safety & Design

Safety Features

Low Oil Alert • Circuit Breaker • CO Sensor

Starting Mechanism

Recoil Handle
