Overview

High-Performance 6x4 Firefighting Vehicle

This 6x4 firefighting truck is engineered for rapid emergency response and effective fire suppression in both urban and industrial environments. Built on a robust chassis, it offers exceptional stability and maneuverability across diverse terrains. With a combined 12,000-liter capacity for water and foam, it provides the necessary resources to combat fires efficiently, supported by a high-pressure pump system.

Dimensions & Weight

Weight Specifications

14300 kg
Tare Weight

18000 kg
Payload Capacity

Overall Dimensions

10000 x 2500 x 3600 mm

Performance

Engine Performance

Feature	Specification
Horsepower	290 HP
Engine Type	4-stroke, 6-cylinder, turbo-charged
Emission Standard	Euro II
Max Speed	90 km/h

Drivetrain Features

- 10 Forward Gears, 2 Reverse Gears
- Reinforced diaphragm clutch (430mm)
- Power-assisted hydraulic steering
- 400L Aluminium fuel tank

Firefighting Equipment

Tank Capacity

10000 L

Water Tank

2000 L

Foam Tank

Pump Performance

60 L/s at 1.0 MPa (Low Pressure)

Technical Details

Axle Loading Capacity

Front: 7000 kg, Rear: 2 x 13000 kg

Tire Configuration

12R22.5 Tubeless (11 pcs including spare)
