

7-Inch A24Q4BF Metal Grinding Wheel

This 7-inch grinding wheel is designed for metal grinding applications. The abrasive disc measures 180x6.0x22.2mm and is engineered for a maximum operating speed of 72m/s, with a maximum RPM of 7600.

Overview

Professional Metal Grinding Wheel

This 7-inch grinding wheel is engineered for efficient metal grinding applications, offering a balance of quality and cost-effectiveness. Built with a reinforced structure, it ensures durability and safety during demanding industrial tasks. It is suitable for a wide range of materials, including carbon steel, iron, and alloy steel, making it a versatile choice for metalworking projects.

Technical Specifications

Dimensions

180 mm

Diameter

6 mm

Thickness

22.2 mm

Hole Diameter

Performance Limits

72 m/s

Max Operating Speed

7600 rpm

Max RPM

Specification Code

27-A24Q4BF

Compliance & Safety

Reinforced structure options, including two-net and three-net configurations for enhanced durability.

Reinforcement Structure

Two nets inside • Reinforced design

Certifications

ISO 9001, MPA Z-04889

Usage

Designed for effective material removal on stainless steel, carbon steel, iron, and alloy steel.

Applications

应用于机械、汽车、金属制造、家庭装修、维修等行业

Versatile performance suitable for automotive, manufacturing, and foundry industries.

Compatible Materials

- Stainless steel
- Carbon steel
- Iron
- Alloy steel

Primary Applications

- Metal processing and foundry
- General manufacturing
- Mold processing
- Bearing and gear processing
- Auto parts industry
- Steel industry
