

7 inch Metal Grinding Wheel 180x6x22mm

This 7 inch metal grinding wheel is designed for INOX and steel applications. It has dimensions of 180x6x22mm and a maximum operating speed of 80m/s (8500 RPM).

Product Overview

High-Performance Industrial Grinding Wheel

This 7-inch professional grinding wheel features high-strength fiberglass reinforcement and a durable resinoid bond for optimal performance. Engineered for demanding metalworking environments, it provides excellent material removal rates and long service life on carbon, alloy, and stainless steels. It is strictly manufactured to meet rigorous international safety standards including EN 12413 and ANSI B7.1 for professional industrial use.

Technical Specifications

Performance Metrics

80 m/s

Max Operating Speed

8500 RPM

Max RPM

Material Composition

- Alumina oxide
- White alumina oxide
- Fiberglass reinforcement
- Resinoid bond

Dimensions

180 x 6.0 x 22.23 mm (7 x 15/64 x 7/8 inch)

Compatibility & Safety

Safety Standards

EN 12413 • ANSI B7.1 • ISO 9001

Suitable Materials

Carbon Steel, Annealed Iron, Hard Bronze, Stainless Steel, Hardened Steel, Alloy Steel

Wheel Classification

T27 - 27-WA24RBF
