

7 x 1/2 x 1-1/4 inch Aluminum Oxide Grinding Wheel

This grinding wheel has dimensions of 7 x 1/2 x 1-1/4 inches and is designed for precision grinding. Its 32A60G grit is a medium grit aluminum oxide abrasive suitable for general purpose grinding on ferrous and non-ferrous metals.

Product Overview

High-Performance Grinding Solution

This 7-inch aluminum oxide grinding wheel is engineered for versatile material removal and precision sharpening tasks. Designed for durability and consistent performance, it is an essential tool for workshops handling carbon steel, malleable cast iron, and hard bronze. Its medium grit specification ensures a balance between aggressive material removal and surface finish quality.

Dimensions and Geometry

Diameter	7 inch
Thickness	0.5 inch
Arbor Hole Size	1.25 inch

Technical Specifications

Abrasive Material	Aluminum Oxide
Grit Rating	32A60G

Applications

Primary Applications

- Rough grinding
- Tool and cutter grinding
- Surface grinding
- General precision material removal

Compatible Materials	Carbon Steel, General Steel, Malleable Cast Iron, Hard Bronze
