

710W Variable Speed Impact Drill with Auxiliary Handle

This impact drill is designed for a variety of drilling applications. It features a hammer selection switch, keyless chuck, depth stop, forward/reverse selector, lock-on button, and ON/OFF trigger switch.

Product Overview

Versatile Impact Drill

This 710W variable speed impact drill is engineered for precision and reliability in professional drilling tasks. It features a robust design with a hammer selection switch and a keyless chuck, allowing for quick bit changes and efficient operation across various materials. With an auxiliary handle for enhanced stability and a speed control dial for precise adjustments, this tool provides the control necessary for consistent, high-quality results.

Technical Specifications

Rated Input Power	710 W
No-load Speed	0-3100r/min
Chuck Diameter	13 mm

Electrical Requirements

Rated Voltage	230/120V
Frequency	50/60Hz

Key Features

Core Functionalities

- Hammer selection switch
- Keyless chuck
- Depth stop
- Forward/reverse selector
- Lock-on button for continuous operation
- Speed control dial
- Auxiliary handle
