

72-Cell Monocrystalline Solar Panel

This high-efficiency monocrystalline solar panel is designed for optimal power generation. Featuring a robust construction with a durable frame and high-transparency glass, it ensures enhanced light capture.

Product Overview

High-Efficiency 72-Cell Solar Solution

This 72-cell monocrystalline solar panel is engineered for optimal energy conversion in diverse environmental conditions. Its robust construction utilizes high-transparency glass to maximize light capture, ensuring long-term reliability and performance. Designed to support residential, commercial, and utility-scale projects, it serves as a highly sustainable energy solution for modern infrastructure.

Technical Performance

Performance Highlights

72 units
Cells

Solar Cell Count	72
Cell Technology	Monocrystalline

Application Suitability

Suitable Applications	Residential, Commercial, Utility-Scale, Industrial
-----------------------	----------------------------------------------------

Construction

Build Features

- Durable robust frame
- High-transparency glass
- Environmental resistance
- Long-term reliability
