Overview

Professional 730mm Manual Tile Cutter

This professional-grade manual tile cutter is engineered for precision and durability, featuring a robust aluminum die-casting base and a high-performance tungsten carbide wheel. Designed to handle tiles up to 730mm in length and 16mm in thickness, it offers smooth scoring thanks to built-in roller bearings and an ergonomic handle. Whether working with ceramic, porcelain, or mosaic tiles, this tool provides the stability and visibility required for high-quality B2B flooring and wall installations.
