

750mAh Lithium Polymer Battery

This is a compact lithium polymer battery with a 750mAh capacity. It is suitable for devices requiring a lightweight and rechargeable power source.

Overview

Compact Lithium Polymer Power Solution

This 750mAh Lithium Polymer battery is engineered for versatility in compact electronic applications. Its lightweight, rectangular pouch cell design makes it an ideal power source for wearable technology, IoT devices, and portable electronics. Designed for reliability, this rechargeable cell offers a dependable energy density for modern hardware requirements.

Technical Specifications

Rated Capacity	750 mAh
Model Identifier	LI393746AR
Cell Format	Lithium Polymer (LiPo) Pouch Cell

Application

Key Features

Rechargeable • Lightweight • Compact Design

Typical Applications	Wearable Devices, IoT Devices, Portable Electronics
----------------------	---
