

# 8-Cup Drip Coffee Maker with Thermal Carafe

This drip coffee machine brews up to 8 cups of coffee. It features a thermal carafe to keep coffee hot, a visible water level indicator, and a simple on/off switch.

## Product Overview

### Efficient 8-Cup Drip Coffee Solution

This 800-watt drip coffee maker is designed for reliable performance in home or office environments, featuring a 1.0L capacity that brews up to 8 cups. The unit includes a specialized glass thermos jug to maintain beverage temperature and a swing-out filter holder for easy access. Its sleek black design with stainless steel accents ensures it fits seamlessly into modern kitchen settings while providing practical features like an anti-drip function and visible water level gauge.
