Product Overview

High-Performance Portable Ventilation

This 8-inch portable ventilator is designed for efficiency and ease of use in demanding environments. Featuring a durable, lightweight construction, it delivers high wind pressure and airflow, making it ideal for confined space ventilation. With its integrated carrying handle and stable base, it offers a reliable solution for air supply and exhaust in industrial, municipal, and maintenance applications.

Technical Specifications

Blower Diameter	8 inch
Supported Duct Diameters	200mm - 350mm

Key Features

Key Advantages

- Large wind rate
- High wind pressure
- Speedy rotation
- Easy portability
- One-piece safety switch

Applications

Primary Use Cases	Communication cable maintenance, Ship building, Ship repairing, Municipal underground engineering, Chemical industrial factory
-------------------	--

Design

Design Highlights

Lightweight • Portable • Stable Capacity • Durable Construction
