

8-Port Cat5 KVM Switch

This 8-Port KVM switch allows control of up to 8 computers using one VGA monitor, PS/2 keyboard, and USB mouse. It supports Cat5/5e/6 cabling for connecting to computers.

Overview

Efficient Multi-Computer Management

This 8-port Cat5 KVM switch provides a centralized solution for managing up to eight computers from a single console. By utilizing Cat5/5e/6 cabling, it allows for greater flexibility and longer cable runs compared to traditional KVM setups. Designed for server rooms and data centers, it simplifies infrastructure by consolidating keyboard, video, and mouse control into one interface.

Connectivity

Total Ports	8 ports
Supported Interfaces	PS/2, USB, VGA
Cabling Standard	Cat5/5e/6

Performance

Key Features

- On-Screen Display (OSD) navigation
- High-resolution video support
- Single console management
- Extended distance support via Cat5 cabling
