

8-Ton Truck-Mounted Crane

This 8-ton truck crane is a mobile lifting solution suitable for construction and industrial applications. Its telescopic boom allows for extended reach and precise load placement.

Product Overview

Versatile Lifting Solution

This 8-ton truck-mounted crane is a compact and efficient lifting solution engineered for diverse construction and industrial environments. Featuring a telescopic boom for extended reach and precise load placement, it is specifically designed to navigate confined urban spaces with ease. The unit integrates essential safety systems, including overload protection and emergency stop mechanisms, to ensure reliable performance on every job site.

Performance Metrics

Lifting Capacity

8 ton

Max Load

Key Features

Telescopic Boom, Mobile Design, Compact Size, Overload Protection, Emergency Stop

Operational Support

Available Training

- Product Operation
- Maintenance Know-how
- Technical Standards & Regulations

Maintenance & Technical Advice

To ensure maximum service life and high operational capacity, comprehensive technical support is available. Training sessions can be conducted either at the factory field or directly at the client's site, covering operation, maintenance, and relevant safety laws.
