Overview

Reliable Power for Professional and Residential Use

This 8000W/8500W gasoline generator features a compact, trapezoidal design engineered for both stability and portability. With a mature spherical combustion chamber engine and a commercial-grade muffler, it delivers robust power while minimizing noise and emissions. Designed for convenience, the unit includes an ultra-large fuel tank capable of 8 hours of continuous operation at rated load, alongside essential warning systems for fuel and oil levels.

Engine & Maintenance

Engine Specifications

- Spherical combustion chamber
- Commercial-class large capacity air filter
- Commercial-class low-noise muffler

Maintenance Features

Oil passage clearance, Cleaning switch, Fuel warning, Oil warning

Design & Portability

Build Quality

Compact trapezoidal structure • Bolt-form wheel structure • Integrated handle system

Optional Upgrades

- One-button startup
- Carburetor cleaning switch
- Oil passage clearance

Control Panel

Yes
