

800W Electric Motorcycle with 45 km/h Max Speed

This electric motorcycle is equipped with an 800W brushless motor for strong power. It has a 72V lead acid battery for lasting stability and faster charging.

ADDITIONAL IMAGES

Overview

Designed for convenient urban transportation and daily commuting.

Efficient Urban Mobility

This 800W electric motorcycle is engineered for reliable and eco-friendly urban commuting. Featuring a brushless rare earth permanent magnet motor, it delivers consistent power and stability for daily travel. With a focus on rider comfort and safety, it includes ergonomic design elements, responsive disc brakes, and a high-visibility LED lighting system.

Performance

Rated Power	800 W
Maximum Speed	45 km/h
Controller	12 tube wireless dual voltage

Battery & Charging

Battery Chemistry	Lead acid
System Voltage	72 V
Capacity Options	20AH, 30AH

Dimensions & Build

Ergonomic design built for long-distance comfort.

Dimensions (LxWxH)	1835 x 695 x 1060 mm
Wheelbase	1370 mm
Tire Specification	3.00-10 vacuum tire

Chassis & Safety

Features a dual disc brake system for responsive stopping power.

Braking System

Position	Type
Front	Disc Brake
Rear	Disc Brake

Shock Absorbers	Oil Damping Direct Acting
