

85W Ceiling Fan with 5-Speed Regulator

This ceiling fan operates at 220V/50HZ with a motor size of $\varnothing 163 \times 14.4$ mm. It features a 5-speed regulator and blades set at a 4*30 degree angle for optimal air circulation.

Product Overview

High-Performance Cooling Solution

This 56-inch ceiling fan is engineered for reliable air circulation in professional and commercial environments. Powered by an 85W motor, it delivers consistent airflow with a 5-speed regulator for precise climate control. Its durable iron and PP construction ensures longevity and stable operation under continuous use.

Technical Specifications

Wattage

85 W

Power Consumption

Electrical Requirements

Parameter	Value
Voltage Rating	220V
Frequency	50Hz

Motor Dimensions $\varnothing 163 \times 14.4$ mm

Rotational Speed 290 R.P.M.

Temperature Rising 75 K

Physical Design

Component Dimensions

Component	Measurement
Regulator Size	95mm
Canopy Diameter	225mm
Blade Length	580mm
Blade Width	130mm

Fan Size 56 inch

Materials Iron, PP

Blade Angle 4 * 30 degrees
