

# 9-Input 32-Output Satellite Multiswitch

This satellite multiswitch has 9 inputs and 32 outputs. It is made with anti-rust material and comes with a power adapter.

## Product Overview

### Professional Satellite Distribution

This 9-input to 32-output satellite multiswitch is designed for robust signal distribution in multi-user environments. Supporting both satellite and terrestrial signals, it provides reliable connectivity for up to 32 receivers. The unit features flexible power options, utilizing both the connected satellite receivers and an external power supply to ensure consistent performance.

## Technical Specifications

Terrestrial Frequency Range	47-862 MHz
Satellite Frequency Range	950 MHz
Terrestrial Insertion Loss	1 dB
Satellite Insertion Loss	3 dB

## Connectivity

### Input Configuration

<b>8 ports</b> Satellite Inputs	<b>1 port</b> Antenna Input
------------------------------------	--------------------------------

Output Capacity	32 outputs
Control Commands	13/18V, 0-22KHz, DiSEqC 1.0, DiSEqC 2.0

## System Features

### Power Supply

- Satellite Receiver
- External Power Supply

Cascade Support	Yes
