

90-Degree Brass Low-Pressure Valve with Red Lever

This low-pressure valve is designed for controlling the flow of liquids and gases. Constructed from durable brass, it features a red lever handle and a 90-degree elbow for easy installation.

Product Overview

Reliable Flow Control Solution

This 90-degree low-pressure valve is engineered for versatile use across various industrial and machinery applications. Constructed from durable brass, the unit ensures longevity and consistent performance in demanding environments. Its ergonomic red lever handle allows for intuitive manual operation, while the elbow design facilitates installation in confined spaces.

Technical Specifications

Features

- Durable brass construction
- Easy manual shut-off operation
- Compact 90-degree design
- Leak-proof threaded connections

Material	Brass
Configuration	90-Degree Elbow
Handle Style	Red Lever
System Compatibility	Low-Pressure Systems, Liquid Flow, Gas Flow
Connection Method	Threaded
